PhD's courses:

Internet of Things, Machine Learning, Digital Entrepreneurship, Development of computer systems, Principles of Human-Computer Interaction, Introduction to Graph Theory, Blockchain and Smart Contracts & Academic Writing.

Master's courses:

Algorithm Analysis, Data Structures, Languages, Automata and Computability, Artificial Intelligence, Concepts of Programming Languages, Introduction to Cryptology, Computational Complexity & Knowledge-Based Systems.

Degrees

2024 **Ph.D. in Computer Science**
University of São Paulo (USP) - Brazil · Institute of Mathematics and Statistics

2015 **Ing. in Software Engineering and Informatics**
University San Antonio Abad (UNSAAC) · Peru

2013 **MsC. in Computer Science**
University of São Paulo (USP) - Brazil · Institute of Mathematics and Statistics

2010 **Bs. in Software Engineering and Informatics**
University San Antonio Abad (UNSAAC) · Peru

Publications

2024 Recovery of the secret on Binary Ring-LWE problem using random known bits - Extended Version

2023 Recovering the Secret on Binary Ring-LWE problem with Random Known bits

2022 Vulnerability — Information Leakage of Reused Secret Key in NewHope

2022 The Importance of the Public Global Parameter on Ring-LWE problem-based Key Encapsulation Mechanims

2015 Factoring a Multiprime Modulus N with Random Bits

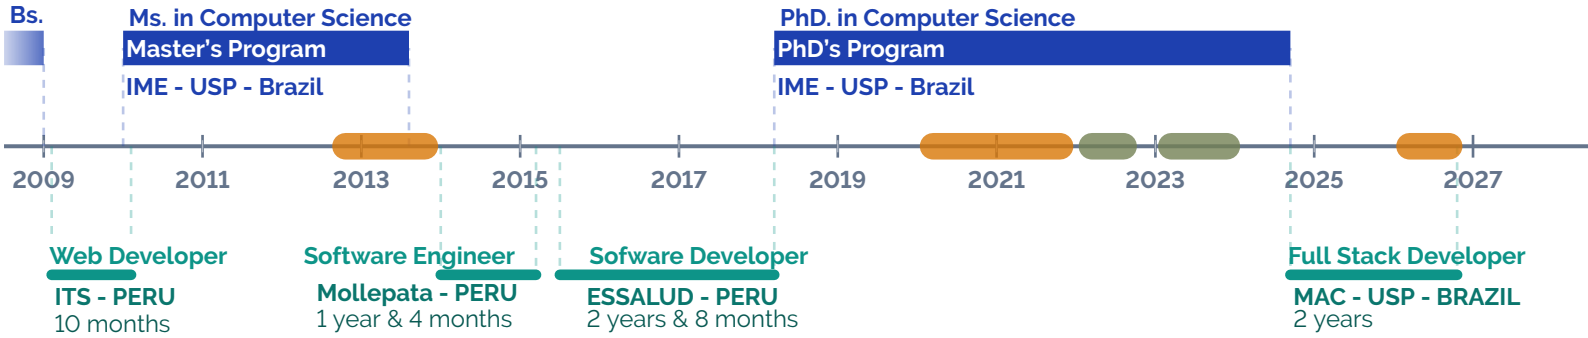

Experience Timeline

Studies: Research experience: 8 years.

Full-Time Jobs: Experience: 6 years & 10 months.

Freelance

Teaching: Experience: 11 months.
